\$ 2999.99

This button allows you to add the three drum sets you need in your life into your cart.

Here we can view all of your instruments you added into your cart and the total amount of your purchase. Oh looks like we have a shipping discount! Lucky us. That concludes the User's Guide for the Front-End portion (Slides 2-19)

User's Guide for Admin Dashboard: Back-End

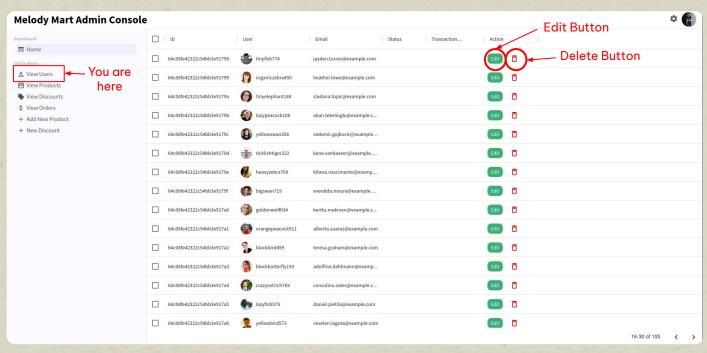

Admin Dashboard User's Guide

On the homepage of the Admin Dashboard there is a widget that tracks account creations for each month.

There is also a
Navigation Sidebar
to the left. From there,
the admin can navigate
through the different
functions of the admin
dashboard

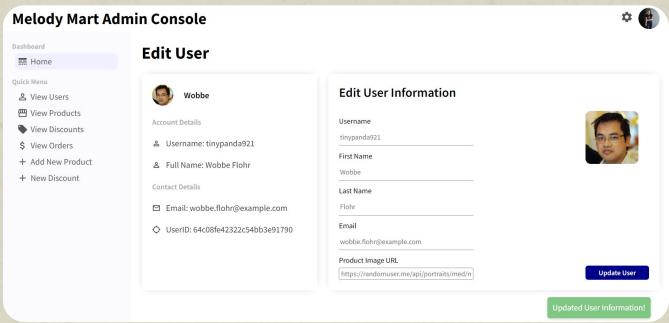

Admin Dashboard - User List

After clicking on the "View Users" on the Navigation Sidebar, the admin will see the Users List. This list populates all users from the database. To the right there is an edit button where the admin can modify any existing user. The second button, the trashcan, deletes the user.

By clicking on the "Edit" button, the admin will navigate to the User page.

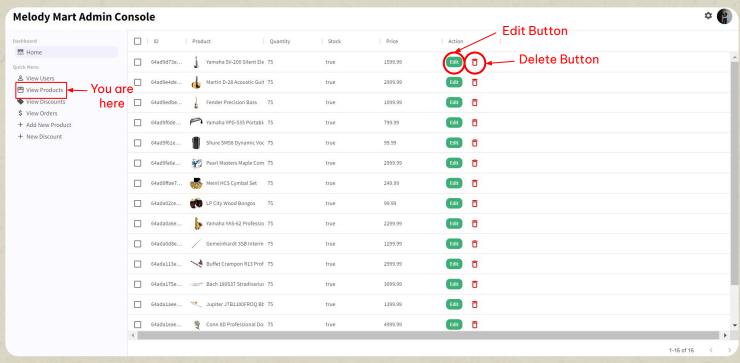

Admin Dashboard - Edit User

The individual User Page is populated with the User ID. The first box to the left contains the information of the user.

The second box can be used to edit the user profile. To finalize any edits, an admin would click on the "Update User" button. A temporary notification banner will appear when a user has been successfully updated.

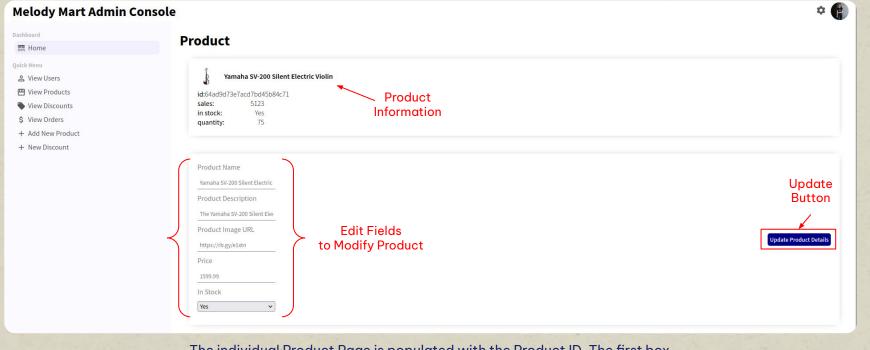

Admin Dashboard - Product List

After clicking on the "View Products" on the Navigation Sidebar, the admin will see the Products List. This list populates all products from the database. To the right there is an edit button where the admin can modify any existing product. The second button, the trashcan, deletes the product.

By clicking on the "Edit" button, the admin will navigate to the Product page.

Admin Dashboard - Edit Product

The individual Product Page is populated with the Product ID. The first box contains the information of the product.

The second box can be used to edit the product. To finalize any edits, an admin would click on the "Update Product Details" button.

After clicking on the "View Discounts" on the Navigation Sidebar, the admin will see the Discounts List. This list populates all discounts from the database. To the right there is an edit button where the admin can modify any existing discount code. The second button, the trashcan, deletes the discount coupon.

By clicking on the "Edit" button, the admin will navigate to the Discount page.

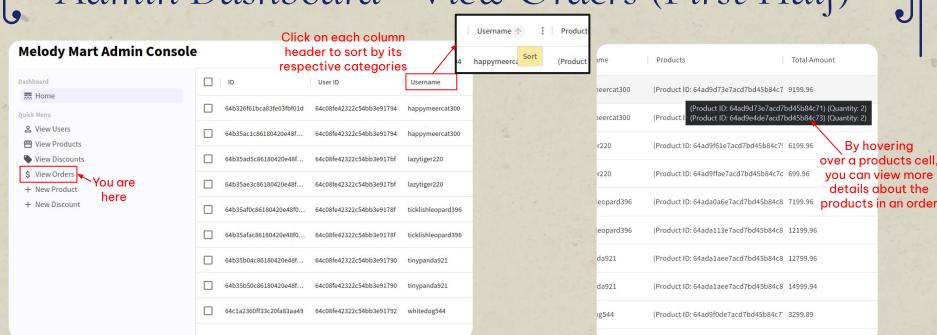

Admin Dashboard - Edit Discount

The individual Discount Page is populated with the Discount ID. The first box contains the information of the discount.

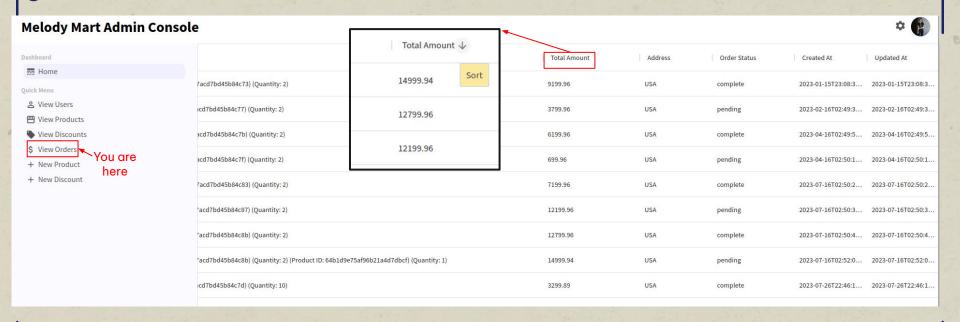

The second box can be used to edit the discount. To finalize any edits, an admin would click on the "Update" button.

Admin Dashboard - View Orders (First Half)

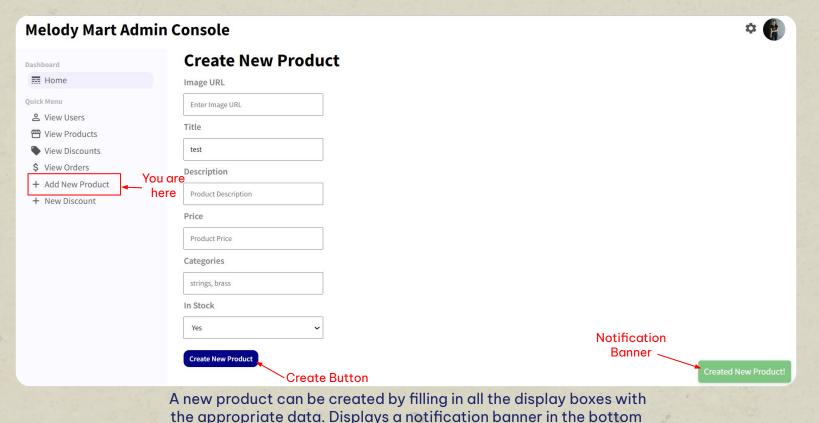

After clicking on the "View Orders" on the Navigation Sidebar, the admin will see the Orders List. This list populates all orders from the database. The Order List can be sorted by their respective headers. An admin can sort by username, the user ID. There are more sort options on the second half after scrolling to the right.

Admin Dashboard - View Orders (Second Half)

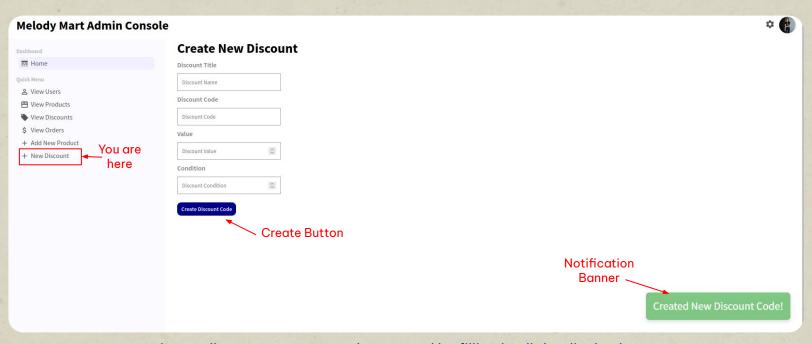

The second half of the View Orders displays the Total Amount, Address, Order Status, Created At, and Updated at headers. All headers can be sorted by clicking on them.

Admin Dashboard - Create New Product

right upon successfully creating a new product

Admin Dashboard - Create New Discount

A new discount coupon can be created by filling in all the display boxes with the appropriate data. Displays a notification banner in the bottom right upon successfully creating a new discount coupon.

Admin Dashboard - Closing Remarks

In conclusion, our group project on creating an ecommerce website for musical instruments, coupled with an efficient admin portal for inventory management, has been an inspiring journey. Throughout the development process, we placed a strong emphasis on usability and user experience, and we are thrilled with the results. By carefully considering the needs of both customers and administrators, we have crafted an intuitive and seamless platform that ensures a delightful and convenient shopping experience for users.

From the user-friendly interface to the intuitive navigation and efficient inventory management tools, we aimed to strike the perfect balance between functionality and aesthetics. Our shared passion for music and dedication to delivering an exceptional user experience have truly shaped this project into a promising online destination for music enthusiasts. We are proud of our achievements and are excited about the positive impact this e-commerce website and admin portal will have on musicians, retailers, and music enthusiasts alike.
